

Important Tips From Evergreen

Traveling For The Holidays?

If you're planning to leave your residence for more than **3** days, we ask you to contact the office and let us know. If something happens in the area, or at your residence while you're away, we'll be sure to take necessary steps to solve the problem!

Did You Know?

Hot air rises, while cold air is heavier and sits closer to the ground. This is why your feet might feel really cold even though the rest of you is warm!

Maintenance Tip:

If your ceiling fan has a reverse switch, use it to run the fan's blades in a clockwise direction *after* you turn on your heat. According to Energy Star, the fan will produce an updraft and push down into the room heated air from the ceiling (*remember, hot air rises*).

This is especially helpful in rooms with high ceilings -- and it might even allow you to turn down your thermostat by a degree or two, thus creating greater energy savings!

DIY Giant Ornament Balloons

Inspired by Studio DIY

- Supply List: 36" Balloons
- Metallic Cardstock
- Metallic Pipe Cleaners
- Strong Tape
- Scallop Scissors (optional)

Cut a strip to your desired size for the ornament topper, usually about 4" by 12". You can even scallop one edge of the strip to add texture! Tape the ends of the strip together, and then tape a pipe cleaner to the top of the cylinder you just made, forming a loop. Finally, tape your ornament topper to your balloon, covering up the balloon's tail.

Happy Holidays from your Evergreen Staff!
